Methodology & Data Transparency

Assumptions, methodology notes, and data limitations

InvestorIQ does not assume or gap-fill missing data. Outputs are primarily attributable to uploaded documents and defined modeling frameworks, with transparency and auditability as core design principles.

Assumptions in this memorandum are permitted only when anchored to uploaded documents or standardized underwriting frameworks. InvestorIQ does not invent missing data or fabricate market inputs.

InvestorIQ Estimates

InvestorIQ estimates are document-backed and framework-constrained, using uploaded documents and standardized underwriting frameworks. When required inputs are missing, those estimates are omitted rather than inferred.

Methodology Notes

Metrics and tables reflect document-backed inputs, deterministic calculations, and framework-constrained outputs. Missing source data is not gap-filled.

Data Limitations & Missing Inputs

This memorandum is limited to the documents provided and the fields that could be verified. Missing values are disclosed and excluded from analysis.
