

PROPERTY INTELLIGENCE

Stonebridge Lofts

InvestorIQ Screening Report

MULTIFAMILY / 64 UNITS

An operating view for the next diligence decision.

64

Total units

93.8%

Physical occupancy

\$945,000

T12 net operating income

Prepared from the supplied property documents.
Source reconciliation matters are identified within this report.

01 / DECISION SUMMARY

The operating picture.

Recorded operations support a useful first view. Two source differences need clarification before progressing diligence.

SCREENING DISPOSITION

Hold for source reconciliation

Confirm the relationship between the rent roll and trailing rental income, and obtain the missing operating-expense detail.

\$945K

T12 net operating income
Reported operating basis

93.8%

Physical occupancy
60 of 64 units

63.0%

NOI margin
NOI / effective gross income

\$180K

Rent-basis difference
Rent roll below T12 GPR

What warrants attention

01 Rental sources use different bases

Annual in-place rent of \$1,432,800 is \$180,000 below T12 gross potential rent of \$1,612,800. The cause is not established by this comparison.

02 Expense detail does not fully reconcile

Listed operating expenses total \$535,000; the source states \$555,000. The \$20,000 difference remains unresolved.

03 Keep the reported operating baseline

Effective gross income of \$1,500,000 less stated expenses of \$555,000 supports \$945,000 of NOI. Do not replace the source total with incomplete detail.

NEXT DILIGENCE GATE

Two questions.

Explain the rental-period and rent-definition differences.

Supply the expense schedule supporting the stated total.

Read-through

These disclosures accompany the operating figures. They do not establish an investment recommendation.

Basis: Stonebridge T12 and rent roll. Occupancy: 60 / 64. NOI margin: \$945,000 / \$1,500,000. Dollar differences compare stated document bases; causes require reconciliation.

InvestorIQ Underwriting Report

MULTIFAMILY / 64 UNITS

An evidence-led view of operations, financing and acquisition diligence.

64

Total units

93.8%

Physical occupancy

\$945,000

T12 net operating income

Prepared from the supplied property documents.
Source reconciliation matters are identified within this report.

01 / DECISION SUMMARY

Operations into capital.

The same operating baseline now sits alongside documented acquisition and financing terms, with source limitations carried forward.

UNDERWRITING STATUS

Source reconciliation required

Retain the \$945,000 reported NOI basis. Resolve the rent and expense differences before relying on a fully reconciled operating case.

\$945K

T12 net operating income
Same Screening baseline

\$13.50M

Purchase price
Documented acquisition input

7.00%

Going-in cap rate
NOI / purchase price

1.40x

Proposed debt coverage
NOI / proposed annual service

What the additional evidence establishes

01 Financing changes the coverage position

Current annual service of \$471,000 produces 2.01x coverage. Proposed service of \$676,249 produces 1.40x on the same NOI.

02 A documented acquisition basis

The \$13,500,000 purchase input equates to \$210,938 per unit and a 7.00% going-in cap rate. Both use the reported operating basis.

03 Open items carry into the deeper review

The \$180,000 rental-basis difference and \$20,000 expense-detail gap remain unresolved after the supporting-document review.

OPERATING CONTINUITY

64 units.

60 occupied / 4 vacant
93.8% physical occupancy

T12 effective gross income
\$1,500,000

Stated operating expenses
\$555,000

Coverage basis

Keep current and proposed debt coverage separate.

Basis: same Stonebridge T12 and rent roll, plus documented acquisition and debt inputs. Proposed service uses \$9,450,000 at 5.95%, amortized over 30 years. No investment approval is expressed.

02 / OPERATING ANALYSIS

From income to NOI.

Reported net operating income retains 63 cents of each dollar of effective gross income, before debt service.

T12 earnings bridge

Annual dollars / reported operating basis

Operating statement	Annual amount
Effective gross income	\$1,500,000
Operating expenses	(\$555,000)
Net operating income	\$945,000
NOI per unit	\$14,766

SOURCE DETAIL GAP

\$20,000

Listed expenses are below the stated total. The earnings bridge retains stated expenses; it does not substitute the incomplete schedule.

The reconciliation that still matters

Resolve the \$20,000 gap before revising NOI. Substituting the incomplete \$535,000 expense schedule would overstate NOI by the same amount.

Basis: Stonebridge T12. NOI = \$1,500,000 - \$555,000. NOI per unit = \$945,000 / 64, rounded to whole dollars. The waterfall uses a common linear dollar scale.
